

## Plant Adaptations

Below are the names of six types of habitat. Can you match the plants in front of you with the habitat in which they live? Give reasons why you think each plant is well suited to the habitat you have matched it with and describe the adaptations the plant has to survive in the habitat.

	Habitat type	Plant	Conditions and the plant adaptations to live in the habitat
	Bog		
	Tropical Rainforest		
	Desert		
	Temperate forest		
	Alpine
